I love the idea of your superhero mod sims 4, but when I download using SFS it says the superhero trait package file is corrupt. Is this a known problem? Yes, because the mod has not been updated in a few months. I'm currently in an intensive program, but I can improve that when my program ends. And that's why you kicked it out? I have a power and a purpose I never had before. I know you're here because you used to love me, and you feel responsible for the bad things that have happened, but you can't change that. And I can't change that. I hated him for so long, and now... We live together, and we have this boy. And it all seems so strangely normal. Forgive our haste, Your Eminences, but our preparations are endless. You've heard we've been called north, where the war dogs are barking again. I'm working on the Superhero pack with some CC, features, custom careers, (and if I can make it work) new interactions, opportunity maps, etc. I added some screenshots of what I've so far some of the items I felt were boring (like recolored t-shirts) and didn't add them. I like how it looks so far, but if someone can give me feedback that would be nice! :D: up: Twilightsims26th March 2018, 12:23 pm AMI really like outfits! The cape is very cool! The trait also seems really interesting, does it give buffs or change how quickly skills are learned? :) dbclayton28th March 2018, 2:11 AMI really likes equipment! The cape is very cool! The trait also seems really interesting, does it give buffs or change how quickly skills are learned? :) The trait is a bunch of whims, about four or so buffs, and significantly improves certain skills (it's easy to guess which ones). I wanted to add some other power traits, such as pyrocnosis or telepathy, but I haven't figured out how to do that work (yet). And I was pleasantly surprised by the cape, the previous attempt it didn't even appear in the game, but this one (adapted from a darth vader costume) even moves the sim shifts around, which was an unexpected bonus! I still have activate the career, but I have not been able yet because I work out on a Mac, and there is no S4PE. Plus I need to figure out how to add your custom icon to the career of this ... Oy. When all this is done, I'm happy to share it with the world. Career levels and descriptions were the most creative part for me. One day I hope that I will be able to add the option maps, interactions, etc. A12027th March 2018, 2:42 am AMI I hope it works well. It couldn't come in time because I'm trying to make a sim already participate in the hero's journey to become a super hero. Making it mechanically legit is all the better. Eggyslav27th March 2018, 10:48 am AMI hope you also do some things superoas after all, which is a superhero without a nemesis?
