De Noor Olé Evinrude, eigenlijk Olé Andreassen Aaslundeie genaamd, emigreerde met zijn gezin in 1881 naar Amerika. Het verhaal van het merk Evinrude begint een paar decennia later als Olé in 1907 de eerste praktische twee-cilinder buitenboordmotor van staal en messing ontwerpt. Na de eerste grote order van 1.000 motoren in 1911, groeit het bedrijf flink en ontwikkelt de buitenboordmotor zich snel. Zo voegt Evinrude een vliegwielmagneetontsteking toe om het starten makkelijker te maken, ontwikkelen ze een 360 graden draaibare besturing én maken ze de motor een stuk lichter door het gebruik van aluminium.Nog voor de tweede wereldoorlog neemt zoon Ralph het bedrijf van zijn vader over en wordt de basis gelegd voor overkapte modellen om onderdelen te beschermen en het geluidsniveau te reduceren.Tegenwoordig is het merk Evinrude onderdeel van Bombardier Recreational Products (BRP) en zit het hoofdkantoor in Wisconsin: een staat in het noorden van de Verenigde Staten.Best of both worlds: E-Tec technologieDe E-Tec technologie van Evinrude combineert het zuinige karakter van een 4-takt motor met de acceleratie en kracht van een 2-takt motor. De E-Tec motoren produceren 80% minder koolmonoxide en zijn voorzien van een geavanceerd olie- en brandstofinjectiesysteem. Dat betekent voor u: zuiniger en schoner varen. De Evinrude buitenboordmotoren met E-Tec technologie zijn te verkrijgen vanaf 25 pk.Officieel Evinrude dealerOutboard Occasions is officieel Evinrude dealer. Chocolategourmand/Flickr Some of the sweets that start with the letter “E” are English toffee, exploding truffles, Eclairs, Easter eggs and Elvis fudge. There is also eggnog fudge, eggnog truffles and eggnog truffle cups.What Chocolate Candy Starts With the Letter ‘E’? It can be hard to find candy that starts with the letter “E.” English toffee is an easy one, which is a rich, buttery candy made of almonds, butter, sugar, and corn syrup, and it is often eaten with chocolate. Other truffles include eggnog truffles and exploding truffles, which are pop rocks candy combined with chocolate ganache in a truffle. Chocolate Easter eggs first appeared in the early 19th century in Europe. Germany and France took the lead to create a new artistic confectionery to celebrate Easter. These chocolate candies come in great varieties, from solid chocolate and creme-filled to hollow eggs with more sweet surprises inside. What Non-Chocolate Candy Starts With the Letter ‘E’? For the non-chocolate lovers, the Everlasting Gobbstoppers, a candy from Roald Dahl’s 1964 children’s novel Charlie and the Chocolate Factory, is always a winner. According to Willy Wonka himself, this sweet treat is, “for children with very little pocket money,” with its changing colors and flavors and never seeming to disappear. Elvis fudge is a treat that features the King of Rock and Roll’s favorite flavor combination: peanut butter and banana. It consists of a layer of peanut butter fudge with a layer of banana and white chocolate fudge on top. Another non-chocolate treat that starts with “E” is Edinburgh rock or Edinburgh Castle rock. This candy is a traditional Scottich confection, which consists of sugar, water, cream of tartar, colorings and flavorings. Generally, it is found in the form of stick, and its texture is soft and crumbly. What Desserts Start with the Letter “E”? Finding desserts that start with the letter “E” is less of a challenge. There are many sweet treats from the éclair, dating back to the nineteenth century, to a little more modern dessert, the Egg Tart. The French éclair is typically represented with a delicate pastry outside, filled with a yellow pudding, and glazed with chocolate on top. However, this dessert is a fan-favorite with flavors ranging from mint chocolate, banana split and toffee eclairs, to name a few. The Egg Tart has outer pastry crust filled with egg custard, commonly found in Hong Kong, China, Taiwan and other Asian countries. Perfect for the holiday season, eggnog fudge is a winner and easy to make. Combine eggnog, butter, cream and sugar, and bring to a boil in a saucepan. Stir occasionally, reduce the heat until you can form a soft ball and stir in white chocolate chips. MORE FROM REFERENCE.COM Photo Courtesy: Dougal Waters/DigitalVision/Getty Images Vitamin E is a compound that plays many important roles in your body and provides multiple health benefits. In order to maintain healthy levels of vitamin E, you need to ingest it through food or consume it as an oral supplement. Read on to find out which foods are recommended sources of this essential nutrient, along with other basics to know about vitamin E.What Does Vitamin E Do?Vitamin E is classified as an antioxidant. This means that vitamin E helps to destroy harmful compounds called free radicals that can build up in your body. Free radicals cause damage to cells through oxidative stress, and they’ve been linked to aging and health problems such as cancer and heart disease. Getting enough vitamin E on a daily basis may help to combat these conditions by protecting the outer membranes of your cells from free radical damage. Photo Courtesy: Leren Lu/Photodisc/Getty Images Vitamin E also plays an important role in your immune system and your body’s ability to fight infection. At certain doses, vitamin E has been shown to stimulate the function of T cells — a type of cell that responds to pathogens that cause disease. Recent studies have shown that increasing your vitamin E intake may correlate with a stronger immune response and greater resistance to infection. Vitamin E is present in the following whole foods: Wheat germ Almonds Plant oils (vegetable, sunflower, grapeseed, etc.) Sunflower seeds Peanut butter Spinach Broccoli Kiwi Mango Daily Dosage RecommendationsAs people age, their daily dosage recommendation for vitamin E increases. For these standard recommended daily doses, a healthy balanced diet is usually sufficient for getting the required amount of vitamin E: Photo Courtesy: skynesher/E+/Getty Images Birth to 6 months: 4 milligrams (mg)/day 1 to 12 months: 5 mg/day 1 to 3 years: 6mg/day 4 to 8 years: 7mg/day 9 to 13 years: 11mg/day 14+ years, including adults and seniors: 15mg/day A person’s age, gender and health conditions can help determine their recommended daily dose of vitamin E. Always consult a healthcare professional before altering your intake of vitamin E from the recommended daily dosage.Taking Vitamin E SupplementsIf it becomes necessary, such as if you become deficient in vitamin E, your doctor may advise you to start taking vitamin E supplements. Vitamin E supplements may come with some minor side effects if you take more than the recommended daily amount or if you combine these supplements with certain medications. Photo Courtesy: Moyo Studio/E+/Getty Images For example, vitamin E may increase the risk of bleeding if you take it with anticoagulants (also called blood thinners) like warfarin. Other medications, like chemotherapy drugs and cholesterol-lowering drugs, have potential harmful interactions when combined with vitamin E supplements. Talk to a healthcare professional before introducing daily vitamin E supplements, and be sure to discuss current medications you’re taking.Signs of a Vitamin E DeficiencyBecause most people are able to get a sufficient amount of vitamin E through their normal daily diet, vitamin E deficiency is rare and typically related to an underlying health issue. For example, because vitamin E is a fat-soluble nutrient, there’s a risk for vitamin E deficiency in people whose bodies are unable to absorb fat properly. Premature infants may also become deficient in vitamin E. Photo Courtesy: LaylaBird/E+/Getty Images When vitamin E deficiency does occur, these are some of its common symptoms: Muscle weakness Unsteady gait Nerve pain or numbness Impaired vision Vitamin E deficiency can be detected with a blood test. It typically resolves with minor changes in your diet or the addition of vitamin E supplements. It’s important to address any out-of-range vitamin E levels with your doctor. Chronic deficiencies may prevent your immune system from functioning normally. Resource Links: MORE FROM SYMPTOMFIND.COM
